REMEMBER TROs

Note: All tables are broken down by AREA RAUC(S) and Trunk Road Operators unless otherwise stated

Report 1 – Utility Company Noticing Offences & Actual Fixed Penalty Notices Given – The total number of potential noticing offences for each utility company triggered during each quarter compared to the number of FPNs given by roads authorities during this period. The number of withdrawn FPNs during the period is subtracted from the actual FPN total.

South West RAUC(S) Area

In this report, only those utility companies with more than 10 actual FPNs given have been included

Report 4b – Minor, Standard, Major Works – The total number of minor, standard and major works, undertaken as a subset of the total works as described in Report 9a.

Report 5 – Roads Authority updating of street gazetteers

This records the roads authorities' performance in submitting revised gazetteers and associated data.

Report 6 – Works Phases Overrun – The number of works closed/clear notices that have been entered for each quarter where the completion date entered is later than the end date given on the last promoter notice. This represents the number of works phases that have overrun without the promoter issuing notice of this until the submission of the works clear/closed notice. This includes Major, Standard & Minor (MSM) works only.

Report 7 – Retrospective Notices – The number of notices issued retrospectively by utility companies. This is a report which the community wished to retain but which the Commissioner does not currently propose to use as an indicator of performance.

Report 8 – Defect Notices issued to Utility Companies – This information is currently recorded by roads authority area basis. The Commissioner proposes to develop a new report which aggregates the number of defect notices for each utility company nationally to allow comparisons to be made.

Report 9a – Works Commenced – The number of works by works type for which an Actual Start notice has been entered, except for urgent, emergency and remedial dangerous whereby the ‘two hours after’ notice is used.

Report 9b – Works Finished – The number of works by works type for which a Works Closed notice has been entered.

Report 16 – Works Phases Awaiting Closure or Registration – Awaiting closure counts if the works has started and the date by which a works clear/closed notice must be supplied has passed. Awaiting registration counts if the works clear or closed notice has been entered into the system but the registration notice has not been sent within the required period.

Breakdown of Works Phases Awaiting Closure or Registration (Utility companies with >30)

Please note large numbers of historical outstanding works are included in these reports. These have subsequently been removed for Quarter 1 2009 to give a more realistic picture of the actual situation.

Report 17 – Standard Notice Activity – This records each of the activities that make up the lifecycle of a road works notice. This will allow the Commissioner to trend year on year the level of activity within the Register.

Report 18 – Interim Reinstatements Due by Utility Company – The number of works which have an interim reinstatement site that is due to be made permanent (represented by the works appearing on the ‘reinstatements due’ enquiry). A permanent reinstatement is overdue if a site is not made permanent within 6 months of the interim reinstatement.
